

Waste Choice & StrapCycle

Capability Statement

Waste Choice delivers sustainable waste management, recycling, prescribed waste services and resource recovery solutions across manufacturing, logistics, warehousing, retail, government and commercial operations. StrapCycle provides dedicated circular economy pathways for PET strapping and plastics, helping organisations improve landfill diversion and ESG performance.

Core Service Capabilities
General waste and mixed recycling
Cardboard and paper recycling
Clear plastic recycling (LDPE, pallet wrap and shrink wrap)
PET Strapping Recycling - StrapCycle
Gas bottle recycling and recovery
Fire extinguisher recycling
Nitrous oxide cylinder collection and recycling
Prescribed waste management
Aerosol can recycling and disposal
Chemical drums with residue
Oily rags and absorbents
Waste chemicals collection and treatment
Timber waste and plastic pallets
E-waste recycling
Organics and food waste
Secure product destruction
Warehouse clean-ups and bulk pallet clear-outs
Solar panel recycling

Specialist Recovery & Prescribed Waste Solutions

Waste Choice provides safe, compliant and environmentally responsible collection, transport and recovery solutions for regulated and prescribed waste streams. Our services include gas cylinders, fire extinguishers, nitrous oxide cylinders, aerosols, chemical drums containing residue, oily rags, absorbents and waste chemicals. We ensure compliant handling, traceable disposal pathways and maximum resource recovery outcomes while supporting ESG objectives and landfill diversion initiatives.

Key Benefits

- Increased landfill diversion
- EPA-compliant prescribed waste management
- Certified transport and treatment pathways
- Full traceability and compliance documentation
- Reduced environmental risk and liability
- ESG and sustainability reporting support
- Circular economy outcomes across multiple waste streams

Industries Supported

Manufacturing | Warehousing | Logistics | Retail | Councils | Government | Commercial Facilities
